How to install Docker in Windows 10

Please follow 4 steps given bellow

Step 1) Enable virtualization vtx of your System (first you can try without it if not work then please Enable I have shown in video how we can Enable**)**

Step 2) Microsoft's Hyper-V. should be Enable

For Enable: please Run given command on PowerShell as administrator

Enable-WindowsOptionalFeature -Online -FeatureName Microsoft-Hyper-V –All

 For Check it is Enable ?

Please run this command

Get-WindowsOptionalFeature -Online -FeatureName Microsoft-Hyper-V

 Step 3) please Download docker given below link

 https://download.docker.com/win/beta/InstallDocker.msi

 Step 4) verification is Docker install?

docker run hello-world.

Docker –version

Note:if it show version and run hello-world command then docker will install successfully
